

# Now you can sleep more soundly, too.

## Announcing the new name in comprehensive children's care: Children's Hospital at Monmouth Medical Center.

Monmouth Medical Center is proud to announce our designation as a children's hospital for Monmouth and Ocean counties by the New Jersey State Legislature. While this is "news," it also confirms our honored tradition of academic excellence and roots in the community.

We continue to set the standard as the region's premier leader in providing specialized services for children from birth through adolescence. As a concerned parent, you can take comfort in knowing that we offer comprehensive care in virtually every area of pediatric

medicine with more subspecialties than any other facility in the region. Equally important to our capabilities, is fulfilling our mission: To provide unsurpassed family-centered services in a compassionate, responsive health care setting.

The Children's Hospital at Monmouth Medical Center. *Delivering the best in medical care to every child.*
